

UAS PILOT

## RICHARD DI CESIDIO

Dynamic, easygoing, and reliable. Bilingual from birth and prefers the outdoors to TV, yet he's ready to tackle long hours at the computer when needed—especially if it's a Mac.

He has consistently balanced a career in civil aviation as a cabin crew member with his work as a creative graphic designer.

In light of the significant challenges facing civil aviation and the rise of new AI technologies, he has now fully committed to a career in drone operations.
